(54) Title: LIGHT FIXTURE CROSS-REFERENCE TO RELATED APPLICATIONS

(57) **Abstract:** A light fixture (50, 250, 350) is formed from a plurality of parts that are substantially snap engageable, thereby simplifying assembly and requiring few or no tools. In one embodiment, the fixture (50, 250, 350) is installable from below through a ceiling orifice and supportable by the ceiling alone, without requiring permanent attachment to an existent support beam. In another embodiment, the fixture is provided with hanger supports for attachment to ceiling hangers. The light fixture includes a reflector (70) having an ellipsoidal geometry with improved lighting efficiencies. Also provided is a firebox (500) that houses a light fixture therein.
